By JOHN PARTRIDGE,

Student in Physick and Astrology, at the *Blue-Ball* in *Salisbury-Court* in the *Strand*, *London*.

LONDON, Printed by E. *Roberts*, for the Company of STATIONERS.

Gentlemen,

I Have Recommended for your Use and Consideration, An [illegible] and faithfully Calculated, *de Novo* from the *Caroline Tables*, for this present Year 1700, by Mr. *Roger Coke*, an ingenious modest, and able Artist. And for the Benefit of his Astronomical Countrymen, doth promise to continue it yearly; Printed by the *Company of Stationers*, as other *Almanacks*.

The principal Reason that moved our Author to this good Work, was his observing that Abuse put upon the World last Year, and call'd, An *Ephemeris*, and said to be done *de Novo* from the *Caroline Tables*, when indeed it was *de Novo* from *Partridge*'s Ephemeris only, and perhaps something worse. And such another, by the same hand, we are like to have put upon us again this Year, with the same Terms and Errors; but *Caveat Emptor*.

Those Medicines formerly mentioned for the Cure of the *Scurvy, Dropsy, Vapours* in Women, Disorders of the Stomach and Bowels, *&c.* with my Judgment on Urines, are still to be had of the Author *J. Partridge*, at his House in *Salisbury-Court* in the *Strand*; but more especially a method and Medicines for the Cure of the *Gonorrhœa*, or Running of the Reins, and all Recent Claps, safe and shorter than any generally us'd. Let those that have been abus'd by others, try it.

At the *Golden-Ball* in *Devonshire-Street*, without *Bishops-Gate*, *London*, is still sold that admirable Worm-powder, famous for the Expulsion of Worms, destroying Vermination, and the direful Symptoms that attend them. Prepared for all Constitutions, from the Womb to the Tomb, to that degree of Art, that it seldom makes the youngest Child Sick: which by long Experience is manifest to the World. Prepared by *R. Gosh*, Chymist.

I have already promised to print *Ptolomy*, with a Comment on some Chapters of the Two last Books, and it must be done at our own Charge; and therefore I intend it by Subscriptions. And I would desire those Gentlemen that are willing to subscribe, to let me know their Intentions, and I will send them the Conditions.

A perpetual Table of Sun Rising and Setting, Length of Day and Break of Day.

The INTRODUCTION.

In a Dialogue between the Pope and a Non-swearing Parson.

'TWas on a Holy-day, the Pope Living there;
But what it was, I have forgot, I'll swear,
Whether St. *Dennis*, *Bridget*, or St. *Clara*.
The *Holy Father*, to Adorn the Day,
Was monstrous fine, Three *Crowns* and *Holy Key*,
Crosses and sacred Arms, *Arm'd Cap-a-pie*.
His Priest-like Sons too at his Heels were seen,
Whose Faith cap-did their Reason in the thing.

They're Deeper Lads, that cannot be decoy'd,
Nor set their *Nets* and *Snares* aside.
In holy Form, according to the day,
Each Man advanc'd; the Captain led the way,
Whom he soon spy'd, though at a distance seen,
A *Pilgrim* (as he thought) approaching them.
And by his *Garb*, which was worn something near,
He Guess'd his *Country*, and his *Character*.
They both jogg'd on, and when within his Ken,
And at a modest distance, thus began:
Salvete fratres! Then the *Pilgrim* stood;
He saw his *Holy Father*, and he bow'd.
Salvete Patres, by that word he show'd
His Duty, and how far their Faith h' allow'd.
Tis'd I see (dear Brother!) and what's more,
You *Limp* as if your *Pesty-toes* were sore.
Father. 'tis true, to you I must not Lye,
I'm *hungry*, *cold* and *weary*, *sore* and *dry*.
But, *prithee Brother*, what is in that *Pack*
That seems so *weighty* on your *sacred Back*?
Weighty indeed? but for its Worth I'll pass,
'Twill make all *Rome* and *Italy* rejoyce;
'Tis *choice* and *good*, and many a step I've come
To see what Market it will find at *Rome*.
But what is't, *Brother*! thou hast brought so far?
Passive (with that he stope) *Obedience*, Sir!
Ah Brother (quoth th' Old Fox!) with that he smil'd,
It hath your Head, but not your Pocket fill'd,
And if 'tis that for which you're hither come,
Take back *your Ware*, we have more Wit at *Rome*
But with my Sons (whose Blood the Vine inflames)
You'll soonest meet with *broken bones* than *Beggers*.
Have I from *England* our choice Growth brought here,
And for my pains receive a sacred Jeer?
Pox on my Fate!
Fy, Brother, fy! this I like worse and worse;
You that can't *Swear*, 'tis strange to hear you *Curse*.
Swear! what a pother here's about an Oath!
As God shall save me, Sir, I'm full of both.

And so Father &c. exit.

All hail my Masters! In this lucky Whim
The Prince of *Wales* his Progress did begin.
Great things he promis'd, like the best, in vain;
That *Lying Prophet* was of *Ahab's* strain.
His Faith was like his Friendship, both untoward;
His Words were soft, a Bitt'ring, Jug'ling Bard.

Never contriv'd (or play'd the fool) to do?
From his first Swamp (form'd by the God above)
His tainted Carkase with its Maker strove;
Finely he talks, but brutish in his way,
By Reason, his false Guide, he's led astray.

This was the Month (of grumbling I speak the thing)
When the Cast'd Conspirators were to Kill the King:
'Tis hard to say, whence sprung that Noble Pride
From their Cast'd Morals, or their preaching Text.
Both in the Crowd, like the Industrious Bawd,
With Toil and Labour carry on their Trade.

Where Murder reigns, all lesser Crimes obey.

Monthly Observations.

Last Quarter, the first day, at noon.

The General Affairs of *Europe* begin to move and look with an angry face; yet I do not think things are yet ripe for Action, or fit for what they are design'd. Yet a little while and you'll see.

New ☽ 9 day, 3 ho. 53 min. afternoon.

If his Majesty of *Poland* was born, as some say, *Apr.* 27. or, as others, *May* the 2d. 1670; he is like to have a very troublesome year of this, and that from the long Transit of *Mars* through *Scorpio* all this Summer, and some other things. There is a Fire kindling in those Northern parts, I hope to a good purpose.

First Q. 16 day, 49 min. past 11 at night.

Mars hath lately been in Trine to the Sun, and now turning Retrograde in a fixed Sign. The Souldiery of Nations may sleep a while, but I think not long, perhaps this Century may end first; and perhaps not, if *Nostradamus* says true.

Peace to its Glory, Vine to its Age.
But hold! Mechanics I am interrupted here,
And bid for some unwelcom News prepare.

This Stanza is worth observing, it falling into pat with the present affairs of *Europe*; I need say no more of it, you will guess at the Man. If I mistake not, that very Prince and Kingdom will be the general talk of *Europe* in this, but especially in the following month.

The Aspects of this month are few, but full of matter. News from *Ireland* of Insolencies and Insults by the *Tories* and *Rapparees*. I fear we shall hear of Perjuries and false accusations discovered; Abuses of our Coin detected, and some unusual Ways and Villanies in Thieving.

Monthly Observations.

The Aspects of this Month look as if they did intend to bring some mighty thing to pass for the good of *Europe*, and Mankind in general; yet after all, it is but a faint shew, and things are left as they were before, in an odd wrangling sort of a Condition, just like the Opposition of the *Sun* and *Mars*, and the *Sun* in square to *Saturn*. The Kingdoms more especially affected with these Influences, are *Poland*, *Spain* and *Portugal*; nor is *France* perfectly free from uneasiness, or that King in good order of health. *London* is likewise sensible of the Rays of *Saturn*, which may give that City some discontent among her Inhabitants; or a sort of severish Disorder attended with Malignity more than is usual at this season.

May the 20 and 22 in 1685. Dr. *Oats* was whipt for accusing the Papists with matter of Truth: It was a barbarous Punishment, but too much like the Papists, *&c.*

The *Earth* weyl, and so doth all its *Crand*,
When the Eternal Power *speaks aloud*:
Great things approach, swift Time prepares the way;
And to be done by *Hands* as *Great* as *they*.
Slowly they move, but *certainly* they come,
As sure as Day before the rising Sun.

So have I seen at *Rome*, those curst Deceivers,
The motly Herd of Priests (and their Believers,)
As sharp as Cat at Mouse, or Dog at Bear,
And ev'ry Sot's a Soul Solicitor:

And special Christians they themselves no doubt.

Monthly Observations.

We *English* have two sorts of People among us; one of them grumble without a cause, and the other hope without ground; and how to cure them is a work too hard for me. The fore part of this Month gives us but little fresh Intelligence, but what was the effect of the last Month.

New ☽ 3 day, 3 min. past 5 Aftern.

first quar. 10 day, 58 m. past 10 morn.

But the latter part of this and the former part of the next will furnish us with many a lamentable Story, and therefore pray observe; for about this time you will hear of more *Duels, Murders, Inhuman Cruelties, Self-Murders*, and *unhappy Accidents* of *Death* and *Mortality*, than at any one time in this whole Year beside: Ill news from *Ireland* that sounds to the same purpose, and I hope a just Punishment will follow them as their due.

Full ☉ 18 day, 41 min. Afternoon.

last quar. 26 day, 26 min. past 7 morn.

Pray observe also the Effects of this hopeful holy Square of *Saturn* and *Mars*.

Cheat not your selves, nor yet promote that Whim,
To think these Nations shall that work begin:
For all great Works the *East* was still the place;
The *Day breaks there*, and so indeed shall *this*.
Nay! those that know not *Christ*, or lamely do,
Shall first begin *Antichrist's Overthrow*.

Monthly Obſervations.

New ☽ 2 day, 11 min. before 1 morn

Both the Ingreſs into *Libra*, and the Lunation preceding it, are but unhappy ones, and the worſe, becauſe attended by this untoward ſquare of the two Malefick from the Houſes of *Jupiter*: The meaning of it, in ſhort, will be about

Firſt quart. 9 day, 15 m. before 1 morn things of Religion, attended with more Perſecution in the Popiſh Countries: Lord! Abate their Malice, leſſen their Power, and confound their Devices, for thy Truth's ſake. *Erunt etiam in luminibus Febres*, ſays *Meſſahalah*. It ſhews alſo a little ſickly ſort of a ſeaſon.

Full ● 17 day, 9 min paſt 5 morn.

Under the influence of this Square uneaſy Spirits begin to diſturb the common Peace of Nations, by diſturbing their Councils with baſe Advice; and yet this will not appear preſently, but

Laſt quar. 24 day, 14 min paſt 6 night after ſome time: Perhaps they may endeavour to diſturb their Brethren in *England*, if they can too.

We're doubt the place, though far, and out of call,
Not yet the People, tho their Faith be small;
For when the time is come that God hath set,
He'll find a People, fit, and make em fit:
He'll do his Work, none shall Obstructions raise;
He never wants for either Means or Ways.

As lean and bare as Cully from his Whore.

Monthly Observations.

Of the Eclipses for the Year 1700.

FIve times will the two Lights of Heaven be deprived of their Light this Year: Three times will the Sun be hidden from our Eyes by the opake Body of the Moon; and twice will the Moon lose her borrowed Light, by the Earth's Shadow: and in the order following they happen.

The first is of the *Sun* on the *8th* day of *February* a little before Midnight; and therefore not to be seen by any Mortal that dwells in our Hemisphere.

The second is of the *Moon* on the *23* day of *February* in the Morning at seven of the Clock; it will be total with continuance, but scarcely seen here, because the *Moon* sets presently after the Darkness enters her Body; but they whose Meridian is removed to the Westward 4 hours and a half, will see it a very great Eclipse, and in their Meridian: and those are the Inhabitants of the *Leeward Islands, Guiana, Jamaica, Darien, &c.* The Eclipse falls in our sixth House, and in *Virgo*; and of such an Eclipse *Ptolomy* says, *Denna Volucrum significatur, earum præcipue, quarum in humano victu usus est*: That it shews Destruction to Fowls used for human Diet. And *Proclus* tells us, *It shews Injury and Damage done to the Great Men belonging to the Law in divers Nations.* But *Giuffus*, as it relates to the House, says, it shews *a spreading of Heresy, and that there shall be more Lewdness than usual*: and I think that cannot well be, to say the truth of the matter.

The third is of the *Sun* on *August* the third, at five of the Clock afternoon, but because of the Moon's great South Latitude, it will be invisible to us and all the Northern Parts.

The fourth is a great Eclipse of the *Moon* on *August* the *18th* at one of the Clock afternoon, invisible to us, but to be seen by our Antipodes.

The fifth and last is of the *Sun* on the *2d* day of *September*, at one of the Clock in the Morning, and therefore not to be seen by us, or any in this Hemisphere.

Of the four Quarters of the Year.

THE *Brumal-Quarter* takes its Beginning from the *Sun's* Entrance into *Capricorn*, which is this Year the 11th of *Decemb.* at Noon, 1699; and Cardinal Signs on the four Angles: Nay, and the beginning of them too, which must, *without any other Concomitant Positions*, shew great and mighty Things in the World this Quarter and Year also, if you will believe the mad Whim of the Author of *Cardines Cœli*: But I doubt not, by this time the World is well satisfied in the Man and his Doctrine; if not, they will be.

The Truth of it is, The Ingress is remarkable, the Season and Time considered, and will appear to be the Parent of some future Actions not yet known or apprehended. The *Sun* and *Moon* are with *Jupiter* and *Venus* in Conjunction in the 10*th*, and all of them in Square to *Mars* in *Libra* in the 7*th*; so that you see here are six Planets in Cardinal Signs, which is to be observed, but not the empty Signs without the Planets, *as a weak Man teacheth us.* We need not run to Authors to tell us the meaning of these Positions; for he that hath seen Nativities of the like kind, and also observed their Effects, may readily and easily conclude what we may expect from this Ingress; remembring what *Dasypodius* says, *Cor Cœli est validius omnibus.*

There is not such another Ingress as this, till *March* 1702, and then at the Full Moon, preceding the Ingress into *Aries*, we have such an one as this almost, but more violent; and therefore I judg that this very Ingress will be attended with considerable Effects, preparatory for the Year now at hand. Hence then expect to hear of *Diets, Councils of State*, and the Meeting of such like publick Assemblies, in order to secure themselves and Liberties; and this by entring into Leagues and Confederacies; to what end you may guess by their applying to the Square of *Mars* in the 7*th*: but as the *Sun* wants 17 Degrees of that Square, so it will not appear presently; yet the Square of *Mars* and *Mercury* will (I really think) begin a Breach this very Spring ensuing.

The *Spring-Quarter* begins this Year *March* the 9*th*, 36 min. past 1 of the Clock Afternoon; and *Leo* ascending in the *East*; there is no great matter in the Figure it self as to the Positions in general, most of the Planets being Cadent and Peregrine: But

that which makes it the more remarkable, is, That it happens to be at a New Moon, and in the Ninth House; that is, the Sun and Moon are both past the Meridian; and if we may give Credit to the Exactness of the Figure, they are also in a Mundane Parallel with *Mars* in *Scorpio*; which I take to be the most remarkable Position at the Ingress.

And yet I dare venture to tell you, This will be a very *remarkable Year*, and that it will produce great and strange Accidents and Disorders in some, nay, in many Parts of the World; and this as well by Mortality of great People, as by Wars and Effusion of Blood. And this I am induced to believe, first from the Eclipse of the Sun in *September* last, in the first Degree of the Sign *Libra*, in the 10th and 11th Houses of Heaven: And that which makes it the more eminent is, the Opposition of the two Maleficks, *Saturn* and *Mars*, from those two fixed Signs *Leo* and *Aquary*; and *Mars* at the same time near the *Lion*'s Heart, a Regal fixed Star. Eclipses of this kind are, for the most part, attended with Plot, Treachery among Mankind, Rebellion, Death of the Great and Noble, Division and Confusion among the Ecclesiasticks, pestilential Diseases, mighty Storms and Tempests, &c. But in my Opinion this doth more particularly shew Treachery and Villany privately contrived, and also some Insurrection or open War in *Europe*, Eastward from *England*: Nor do the Effects of this Eclipse end with this year, but it will also extend its Effects to the next. You may remember we had such an Eclipse in *September* 1680; and then we were bought and sold by *French* and *Popish* Councils, jail'd by the *Tories*, and murdered by *Irish* Evidence, or *English*, perhaps, something worse. In *March* 1662, we had an Eclipse in the beginning of *Aries*; look back and see what were the Effects of that. And to mention no more but this: The cursed Popish Powder-Plot was attempted by the Papists to destroy the King and Parliament at *Westminster Novemb.* 5. 1605, just after a great Eclipse of the Sun in *Libra*; but this of ours is greater, as being in the very Equinox, and attended with an Opposition of *Saturn* and *Mars*.

Secondly, By the Authority of those that have a Repute for Prophecying, and that are believed to have long since foreseen great Changes and Mutations in the World, some past, and others approaching, which I do really think the World will be made sensible of in a very few years: and to this end see *Nostradamus*, pag. 38.

Ceux d'Orient par Lunaire Loüer
Et au Mil sept Ceux servat Grands Ennuitz,
Subjuguer presque le Nort Aquilonaire.

By *Garencieres* thus English'd:

Those of the East, by the virtue of the Moon,
In the year 1700, shall carry away great Droves,
And shall subdue almost the whole Northern Corner.

Here *Nostradamus* speaks positively of this Year 1700; and yet if you compare this Stanza with some others, it is but a forerunner of greater Things approaching; as you may see *Century* the 6th, *Stanza* the 2d, speaking of the year 1703, that there shall be great Mutations in *Europe*. And he seems to allude to the same year in the first Century, Stanza 51. speaking of a Conjunction of *Saturn* and *Jupiter* in the Head of *Aries*, which in all likelihood is this in 1702, in the beginning of *Aries*; which shall cause great Troubles and Commotions in *France* and *Italy*. This Expression (by the virtue of the Moon) seems to shew the *Turk* is hereby meant, who carries the three half Moons in his Standard: but I cannot by any means allow him to give *Europe* such trouble at this time, he being not able to offend his Enemies; nay, scarce to defend himself. But I confess the Czar of *Muscovy* seems likely to do something, he being both able and willing to enter upon some great and eminent Action.

To corroborate this of *Nostradamus*, pray hear what the *Turkish Spy* says in one of his Letters written in the year 1672, in the 7th Volume, *page* 307; 'where he tells of a Man at *Astracan* that they called the *Wandring Jew*, who did openly in the 'Streets declare that there should be a general Reformation of 'Christianity every-where, after the year 1700: and that it shall 'be begun by an *Englishman*, a Man of great Vertue and Religion: and then he says, Father *W.* I would not have thee despise these things, since they have been long foretold by *Joachim* the Abbot, by St. *Methodius*, by *Nostradamus* the *French* Prophet, and many other eminent Persons, whose Writings 'are extant, and many of their Predictions are already come to pass. The like also he toucheth upon in *page* 309. But

in part; for he tells positively, 'That about the Year 1300, 'the invincible *Ottoman* shall break down the Fences of *Europe*, 'and shall overflow Christendom like a mighty Torrent that 'hath over-topt its Banks. In those days there shall be great 'Desolation in *Hungary*, *Poland*, *Germany*, *France*, and other Re-'gions of the *West*; only *Denmark*, *Sweden*, *Muscovy*, and some 'other Countries of the *North* shall remain untouch't. But 'above all other Nations he says (that is, the *Jews*) *Italy* will 'be made a perfect Wilderness, her Cities laid in Ashes, her 'Immense Wealth plunder'd and carried away by the greedy 'Tartars, Arabians and Turks, who will spare neither Age nor 'Sex, putting all to the Sword, especially the Ecclesiasticks; 'none of which shall escape the publick Vengeance, save three 'Cardinals, sincere and holy Persons, who shall fly into *England* 'for Sanctuary by the way of the Sea.

'That Island (that is, *England*) shall become the Refuge of all 'those that escape the Calamities overwhelming the adjacent 'Countries. The King of that Country shall receive those di-'stressed Fugitives with open Arms, and shall assign them cer-'tain portions of Land, *&c.* there being much waste Ground 'in that Island which they may manure to their own and the 'publick advantage.

'After this, says he, shall arise a certain Man in *England* from 'an obscure Center; a person fill'd with all manner of divine 'Knowledge and Wisdom, endued with the spirit of Prophecy; 'a Man mild, innocent, chast and merciful above the rest of hu-'man Race, and highly belov'd of God and Man. This Man 'shall meet the three Fugitive Cardinals in an hour of Destiny; 'the Light of God shall be diffused through his Soul, his Heart 'shall be like a Lamp, and his Tongue shall utter marvellous 'things; he shall shew them a new pattern of the Law of *Je-'sus*, the Son of *Mary*, or rather the old and true one, freed from 'the Corruptions and Errors which have been superinduc'd for 'many Ages. This holy Person shall reform the Errors of all 'the Christian Churches; utterly abolish the Use of Images and 'Pictures; convince the *Jews* of their Infidelity, and chase away 'the darkness of Superstition from the Earth.

'Foreign Princes shall send their Ambassadors to the King 'of *Great Britain*, and to him, for he shall be at his Right hand; 'they shall all enter into League and Covenant; and all the 'Christian Princes shall be at Unity. Mighty Armies shall be

'raised

raised in the North, who shall come down and give new Courage to the oppressed Remains of the East. They shall all take up Arms, and chace the Osmans back again to their own Country, recovering the Wealth which they had taken from them. After this, by an Universal Agreement of the Christians, this holy Person shall be proclaim'd the great Pastor of the Church. A prodigious Army shall be gather'd together out of all the Christian Nations, to Conduct him to the Holy Land, and to Crown him in Jerusalem; they shall vanquish and exterminate the Osmans out of Palestine, and all the adjacent Regions. Then shall Jerusalem be built gloriously, and shall be the Seat of the Christian Mufti's, and this new Patriarch and his Successors to the Day of Doom; then the Eyes of the Jews shall be opened, they shall acknowledge Jesus to be the true Messiah, whom they have so often Cursed. In a word, he says, both Jews and Gentiles, People of all Nations shall resort to Jerusalem, or send thither their Gifts and Presents, and it shall become the Mistress of the whole Earth.

Thus far *Verbatim* (as to the principal part of the relation) from that wandring Jew, as it is related by the *Turkish Spy*. Where, by the way observe, by the *Osmans* he means *Turks*, vid. *Blount Thesaurus*, pag. 237. As to the Book it self, I leave it to be judg'd by the Readers touching its Reality and Certainty; and say only this: That it is very like Truth in the principal things related, some of which the World will certainly see and feel. But by the way, let not the Reader expect all these things in 1700, or suddenly after it; for I know some of these things will not happen till about the Year 1762, but all of them in this Century ensuing, and before 1800. The World hath indeed been deceiv'd by false Calculation from that Apocalyptical Number 666, making that to be the Ground of the Calculation for the Downfal of that Man of Sin, Antichrist, or the Popish Heresy and Tyranny; which was indeed nothing else but his Character, the more perfectly to discover him to be *that Man of Sin* that the Apostle aim'd at in his Discourse at that time; as our Countryman *Potter* well observes in his Treatise on that Number. How many believed 1666, to be the Year of his Downfal, and the beginning of the *Grand Millennium*? Others they depended on the Year 1670, and others on 1688; and some as vainly as they, on the Year 1697, and 1698. But, alas! they

The *Summer-Quarter* begins this Year at 42 min. past two of the Clock Afternoon, *June* the 10th. At this Ingress we find *Mars* in *Scorpio* just turn'd direct, in which Sign he hath been ever since the beginning of *January*, and will continue there till the middle of *August*, being 8 Months almost. This Transit will mightily influence the Affairs of many Kingdoms in *Europe*; It will disturb *Ireland* with Robbers and Thieves, doing much Mischief and Cruelty. *Poland* will suffer by Divisions and intestine Broils, if not Insurrections and War, *quod nutumdum est*. *Russia* and those Dominions will be concern'd, I think, rather to offend than suffer. In *Africa* there will be Commotions, and also Disturbances: The Kingdoms of *Fesse* and *Algiers* will be here concern'd, and perhaps reach as far as *Persia*: And as the Sun meets *Mars* with a Trine just after he is turn'd direct, so we may rationally judg the Soldiers in a certain Country begin to move, as if they intended to fall to Action. The Square of the *Moon* and *Mercury*, and *Saturn* and *Mercury*, shew there will be many Projects to deceive and abuse Mankind; sometimes by lying News, otherwhile by downright Roguery.

The *Autumnal Quarter* begins at 24 min. past 4 of the Clock in the Morning, *Septemb.* 12. at which time *Virgo* ascends with *Mercury* in it, in Opposition to *Saturn* in the 7th; and both of them in Square to *Mars* in *Sagittary* in the 4th House: You see the Sun and Moon are both safe and free from the ill Rays of the malefick Stars; and therefore I judg this Quarter will be spent in wicked Contrivances, intended for knavish and villanous Ends, Persecution, Oppression, and extravagant Exactions in divers Countries *East* and *South East* from *London*. I think things are not yet ripe or ready for a Massacre, which the Protestants must e're long expect that inhabit Popish Countries. The late Square of *Saturn* and *Mars* shews, that the generality of Mankind shall be wholly bent to do that which is wicked and unjust, and that by clandestine treacherous means and ways, even to the ruin and destruction of their Brethren; *Mala malis, Rixa & Injuriæ*, says one upon such a Position. The Councils of *France* tend to Violence at home, and not so successful abroad as he useth to be: If that Prince's Nativity is given true by *Morinus*, he hath at the Age of 63 almost the Ascend. to the Body, and *M. C.* to the Square of *Mars*, and that in the Summer 1701. Thus I have given you a short Judgment of the pre-

last Year, finishing part of the Astrological Method; yet I think it not altogether impertinent, if we consider the now Impending Fate of *Europe*; And therefore, in short, I will give you my Opinion of the whole Year as a Conclusion to this part. This Year 1700. will produce Commotions and Mischiefs in remote Parts; but as to these parts of *Europe* where we inhabit, we shall yet enjoy Peace and Quietness for about two or three Years; yet, in the mean time, it will be brooding in (almost) all Kingdoms, to be hatched at the appointed time; for at the time of the Conjunction, or suddenly after, we shall find the violent and turbulent Spirits of this World inclin'd to pursue Dominion and Empire by Blood and Destruction; and indeed the time is now approaching when the Powers of this World will be effectually shaken, and if I mistake not, it is very near at hand too; and I look on the Confusion that the World will shortly feel, to be immediately preparatory for the great Work that God in his good time will manifest to Mankind, and to those especially that think highly and doubtfully of that spiritual peaceable time, the *Sabbatical Millenium* I mean.

The Leading Men in Religion throughout *Europe*, will be using their Endeavours more than usual to Establish themselves by Power and Policy, and to suppress and persecute all those that differ with them in point of Faith or Doctrine. The Statesmen of *Europe* will be active and vigilant each in his Station, to secure their Master's Interest, and to prevent Differences and Mischiefs that may arise about Matters of State; and you will find that this Year will be subject to these sorts of Accidents more than at other Times and Years. And this Judgment I make from the Opposition of *Saturn* and *Mars*, from *Leo* and *Aquary* last *September*; *Mars* being in a Regal and Governing Sign, and will spend his Force and Power in things above the Common Sort and Order of Men: and this not by Fighting and Blood, but by Debates and angry hot Disputes and Differences. To this purpose see *Flores Albumazr*, de ☌ ♄ ☍ ♂; and these Effects seem to point at *Rome*, *Italy*, and the Dominions adjacent; these things will not be confined only to that part of *Europe*, but will be also extended farther *North*, even to *Tartary* and *Muscovy*. And that it relates to, and hath signification of Religion and Religious Affairs, take *Ptolemy*'s word for it, *Lib.* 2. *Cap.* 6. where he speaks of the Effects of Eclipses, and you will find that this Opposition will fall in with that Eclipse, and have the same Effects, and also add Force and Violence to it.

And

And to affift the Influence of this Eclipfe and Oppofition, we have a Square of thefe two from religious Signs in *Sagittary* the Year 1700. that is from *Pisces* and *Sagittary*. Hence we may judge that the Councils, Debates, Meetings and Conſultations will be about Religion and Religious Matters, or ſuch things as they are pleaſed to call ſo. And if you pleaſe to remember, I have formerly told you in my Annual Books, that the Concluding Effects of the Conjunction in *Leo* in 1682. would be ſpent about Religion; and I pray God give a good End to it, and preſerve our Proteſtant Brethren from a Maſſacre in the Popiſh Dominions; for I fear ſome Violence of that nature before many years are paſt and gone.

The Spring ſeems to be ſeaſonable, rather dry than wet, cold in the former part of it: the Summer hot, and for the moſt part dry, notwithſtanding *Saturn* and *Mars* are in moiſt Signs; and indeed every part of the Year ſeems ſeaſonable, and promiſing Plenty; and you may obſerve the Oppoſition of the *Sun* and *Mars* in *April*, which I judge will give a hot Seaſon after it, and not wet, though it be in violent parts of Heaven, and often cenſured for wet: See *Saturnus*, pag. 259. At all the four ingreſſes of this Year, the Luminaries are free from the malefick Rays, and therefore not likely to be ſickly, or the Year attended with a general Mortality: You know every Quarter is attended with Diſtempers proper to it in all Years; and therefore what I ſay here relates to Epidemick Diſtempers. And as a Concluſion to the Year, and *Europe* in general, take this ſhort Enigmatical Memorial of their particular Fate in Medical terms. *Germany* will be ſubject to a *deſectio viſus*; *Poland* addicted to the Phrenzy; *Muſcovy* ſubject to the Itch; *Italy* inclin'd to a Conſumption; *France* troubled with the Buſimia; *Spain* with the Vertigo; *Portugal* with the Tremor; *England* with the Loſs of Memory and Gratitude; *Holland* with the Strangury; *Denmark* with the Evil; *Sweden* with Obſtructions, and *Turkey* with the Gout. And thus much for the Judgment of the whole Year. I come now to preſent you with a few Aphoriſms in Aſtrology, not leſs than Principles in that part of Aſtrology where their Uſe is required.

Some uſeful Aphoriſms in Nativities.

The Stars have a Power and Influence from their own intrinſick Natures and Principles; and not from the Ecliptick, or any other imaginary Circle whatſoever, as ſome think. *Ptolomy, Lib. 1. Cap. 2d.*

The

The Aspects and Familiarities taken in the Zodiack are only allocations to those Stars that move in the Zodiack, and not to the Angles and Houſe, as ſome think. *Ptol. lib. 3. cap. 11.*

Every Nativity hath a Giver of Life, and yet it hath but one principal *Living* neither; nor is there any ſuch foolery as a Subterranean *Living*; as one Jame in his Underſtanding would perſwade us there is, after his 50 years painful Study and Writing to inſtruct us. *Ptol. lib. 3. cap. 13.*

There is a *Prochronus* in all natural Deaths, and by conſequence a train of Directions in almoſt every Man's Death, as every true Artiſt well knows. *Ptol. lib. 3. cap. 13.*

There is no Star under the Sun-beams that hath power either to kill or ſave, except when the Moon is Prorogator, and the Sun Interfector. *Ptol. lib. 3. cap. 14.*

All Directions, both direct and converſe, are performed and made by Motion only. *Ptol. lib. 3. cap. 14.*

There is but one converſe Direction kills; and there is one that doth kill. *Ptol. lib. 3. cap. 14.*

The only efficacious things in Revolutions are the returns of the Planets; Nor is there any need to ſet a Figure to the time of the Star's Return to his Radical place; nor is ſuch a Figure of any uſe at all. *Ptol. lib. 3. cap. 15.*

There are Parallels in the Zodiack that depend on the Equator and Tropicks. And by the ſame reaſon there are Parallels in *mundo* that depend on the Meridian and Horizon. *Ptol. lib. 1. cap. 13.*

There is no part of Heaven under the Earth Aphetical, except the Aſcendant, and five Degrees from the *7th*; nor can any Star be *Hileg* in the *2d*, *3d*, *4th*, *5th* or *6th*; and all thoſe Houſes are forbid to be accepted in that Caſe by *Ptolomy*, *lib. 3. cap. 11.*

And now any man that doth deny theſe Aphoriſms, I do challenge him to prove his own, and diſprove my Doctrine by Experiments in print; and I will vindicate my Maſter *Ptolomy* not only in theſe, but the reſt of his Aphoriſtical Doctrine on *Nativities*. I do alſo here again renew my Challenge to *Gadbury* and *Coley*, if they dare accept it, to print half a dozen Nativities, or more, and give Judgment on them according to *their* Principles; and I will print the ſame, and give Judgment according to *mine*, and then the World will be able to judg who is in the right: and in ſo doing we ſhall by degrees bring this Debate to an iſſue. And let them take notice I Challenge them to do it.

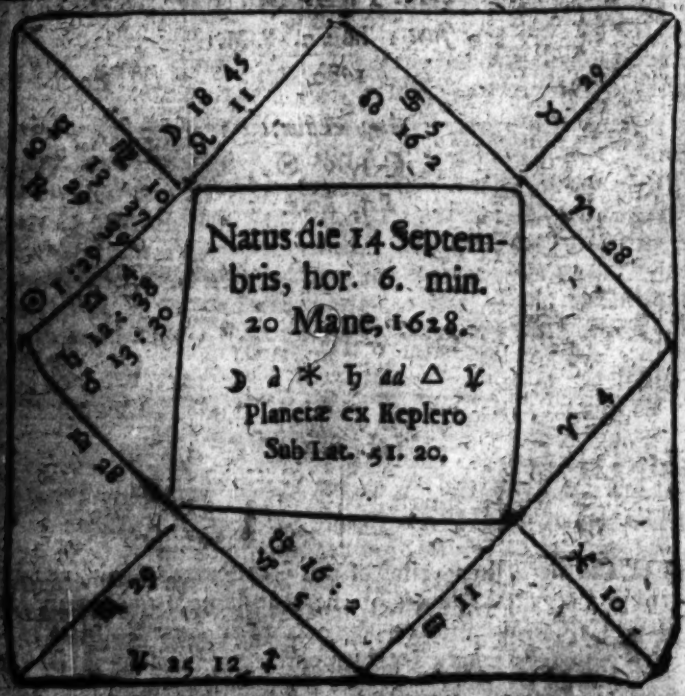
I might have observed other things in this Nativity, but seeing that most Ingenious Treatise is publick, and so to be had by any one, I will leave every Artist to exercise his own Thoughts by comparing one with the other. Having a spare Page, I will here present you with the Nativity of the Learned Dr. *Francis Bernard*, who was well acquainted with this sort of Learning, and also with the Directions that proved the *Atropos* to his Life: the Figure follows, corrected by himself, and was undoubtedly carefully done.



I shall not trouble you with any Judgment on the Scheme in general, but leave that to those that are more curious, and have more Time to spend than I have; Nor need I say any thing of his Parts and Learning, he being so popularly known to excel in both. But my design in printing it, is only to shew the Lovers of this Art the Nativity of so famous a Man of our own Nation; and with that the Directions by which he expired.

About four years before this Gentleman died, a Person of Honour did request me to try my skill on this Nativity, and tell him when he would dye; I did it, and gave it him under my own hand fixed to the time he died, or near it, which he hath by him to shew when he pleaseth; and the Directions were these to the Sun, the undoubted *Hileg*. See the Train.

The truth is, he died on the 9th of *February* 169$\frac{7}{8}$, being sixty nine years and five months old.

Lastly, I have often inform'd you of a *Crew of Cheats* about the Town and Kingdom, that pretend to Charms and Sigils, to do things impossible to be done in Nature; and I do say, all that deal with them are cheated. Therefore I advise these abused People to demand their money again of them; and if refused, to Indict them on the Statute of the 12th of the 1st of *James* the First, which Law was made to punish those Cheats in particular.
